PLEASE NOTE:
• Colours printed with ink will be different to colours displayed on a computer screen or the PDF proof & can look different printed depending on the fabrics used. Therefore, it is essential that the correct Company colours are specified by the client before printing so that our factory can match the colour. Providing a Pantone Reference (PMS number) or a CMYK breakdown ensures colours print as close as possible to your company colours.

COLOURS: PANTONE references are required for all colours used in your artwork. **We do not promote the use of CMYK colours**, if CMYK colours are used, please note that percentages will be rounded up or down to the nearest 5% & we will match to the nearest Pantone equivalent. **Please ensure that Pantone colours are chosen from a Pantone book, not your computer screen as not all monitors display colours the same.** Due to processes used when printing onto a fabric, not all PMS colours can be achieved with an identical match, some variation on colour may occur. **Final banners cannot be rejected on the basis of colour if this has not been adhered to.**
